

If you don't need edit history, you can simply export rows that are both *Done* and *Reviewed by: is not any* to view them in the lazydetective interface and generate an audit report. **Instructions for generating edit history:**

The screenshot shows the lazydetective interface with the following filter conditions applied:

- Task: is not one of Skipped
- Label Actions: Reviewed by: is not any
- Label Actions: Labeled by: is one of usr.email.cm1ugvios014h071a6s5ra1i3@internal.labelbox.com

Additional interface elements include a search bar, a dropdown for 'All (8 data rows)', a 'Label created at' filter, a 'Copy to evaluation' button, and a 'Group by labeler' dropdown.

Filter like so to narrow down the DRs you can use for the audit.

The screenshot shows the lazydetective interface with the 'All (8 data rows)' dropdown menu open, displaying the following options:

- All (64,951)
- In review (51)
- In rework (14,731)
- Skipped (13,409)
- Done (35,506)
- To label (14,663)
- Export data

Additional interface elements include a search bar, a dropdown for 'All (8 data rows)', a 'Label created at' filter, a 'Copy to evaluation' button, and a 'Group by labeler' dropdown.

Export the data (either all DRs if <20 or select 20 from those displayed).

Export fields to include (optional)

Deselect all

**Select all fields when exporting.
!! Change the priority of your selected DRs to 1.
Move them to review.**

Task ID	Task name	Time	User	Status
cmp2sb6js02br071557q5coey	Move data rows to new task	less than a minute ago	ghoshaan@gmail.com	✔ Completed
cmp2sa30e05md074dgvccab1p	Modify queue priority: 202_hours_atc_AU_C...	1 minute ago	ghoshaan@gmail.com	✔ Completed
cmp2s6bof04wy072if6mv8t8v	Export (streamable): project - 202_hours_at...	4 minutes ago	ghoshaan@gmail.com	✔ Completed

Download the 'before' snapshot from notifications and wait for the DRs to be reviewed. Optionally, let SRs know the masked ID you are auditing does not need to be reported.
